

Snake Away Description:

- Dr.T's Snake Away snake repellent is the only EPA approved, university tested and patented snake repellent on the market today.
- Snake Away is Unique - only Snake Repellent in the World. Highly effective on poisonous and non-poisonous snakes! Effective repellent for 2 to 3 months--not destroyed by rain! University tested, EPA Registered and a patented product. As a snake approaches the product its sensory perception is alerted and the snake turns away leaving the area.
- When applied as directed, it is safe to humans, pets and the environment.
- Snake-A-Way is a dry granular mixture which is easy to apply by lightly sprinkling around homes, cabins, trailers, camp sites, and garages.
- Normal rainfall will not harm the Snake Away.
- **Here's How It Works:**
- Snakes are beneficial in a multitude of ways, including keeping the rodent populations down, but snakes are also associated with fear and anxiety. **Snake-A-Way** is a granular repellent that is applied around the perimeter of the area to be protected. When snakes come in contact with the product they are deterred because it interferes with their sensory reception system. The snake flicks its tongue and places the forks of his tongue into the roof of his mouth where the Jacobson's organ is located. Scents and vapor molecules are picked up by the snake giving it very specific details of what is around it. **Snake-A-Way** temporarily shuts this sensory reception down, leaving the snake disoriented, causing the snake to leave the area to seek fresh air.

Snake-A-Way Application Directions:

We recommend you use a pair of gloves. Create bands with Snake-A-Way 4 to 5 inches wide for most snakes.

For rattlesnakes, use bands 8-12 inches wide.

In yards, lightly sprinke Snake a Way over areas within the treatment band.

When the Snake-A-Way is to faint to smell and reapplication may be necessary.

- Re-treatment may also be necessary after heavy rains.
- Apply Spring, Summer and Fall.
-
- **SEASONAL APPLICATION OF SNAKE-A-WAY®**
 - Spring - Most Active Season**
 - Protects your family when they need it the most
 - Summer - Active & Dangerous**
 - Protects your family during outdoor activities

- **CobWeb Eliminator**

- **Cobweb Eliminator**

Cobweb Eliminator is the **only** patented product formulated to eliminate and inhibit cobwebs by deterring their formation. It works by breaking down cobweb attachment points. **Cobweb Eliminator** is 100% natural, FDA/USDA approved and plant/pet safe.

Cobweb Eliminator will not stain wood, painted surfaces, vinyl, fiberglass, concrete or masonry. For best results, use a sponge to apply to metal surfaces and a stiff broom to remove web residue repeat application as needed. **Cobweb Eliminator** does not need to be diluted and its effectiveness varies on different treated surfaces depending on exposure to the elements. One quart of **Cobweb Eliminator** will protect 275 sq. feet for 6 months indoors.

- If you're tired of looking at those unsightly silken strings that inhabit every nook and cranny of your home or business, then look no further. **Cobweb Eliminator** Is the **only** patented product formulated to eliminate and inhibit cobwebs by deterring their formation. **Cobweb Eliminator** is 100% natural, FDA/USDA approved, plant/pet safe, and is authorized for use in food processing plants, restaurants, and plant nurseries. **Cobweb Eliminator** will not stain wood, painted surfaces, vinyl, fiberglass, or concrete, and it eliminates spider webs, dust, pollen and insect debris, thereby reducing fire hazards and respiratory problems.
