

# D-Sect™

## ipm station

**Discrete, Tamper Resistant Station for Baiting, Monitoring, Trapping & Killing Virtually any Insect**

### Uses:

- Baiting ants, cockroaches, crickets, and silverfish
- General/cockroach monitoring
- SPI pheromone monitoring and trapping
- Small (fruit, drain, phorid) fly trapping and killing
- Bed bug monitoring

### Key Use Sites:

- Can be used in "no rodent glueboard" environments
- School IPM, daycare centers and homes
- In restaurants under bars and in display cases
- Semi-permanent installation in food and pharmaceutical processing plants, and distribution warehouses. Inserts in the station can be changed as needs dictate
- On pallets in transit to monitor for infested goods
- In retail stores on shelving behind pet food and grain products to monitor for SPIs

### Beneficial Design Features:

- Use with 3-compartment baiting trays or glueboards
- Numerous uses for one station saves cost and space
- Discreet, measuring just 6 1/4" x 3 1/2" x 5/8"
- Use indoors and in protected areas outdoors
- Available in professional white and convenient clear
- Tamper-resistant, heavy-duty, and "smush-proof"
- Keeps dust, moisture, and pets off glue
- Keyless entry for fast servicing
- Multiple securing options including four corner holes, center knock-out hole and spots on the back for double-sided tape, Hercules Putty, construction adhesive or Velcro
- Rebaiting knock-out holes on cover for refilling gel baits without opening.
- Included Service Labels can be placed inside or outside
- Can be mounted in any orientation on walls, floors etc.

**EXCLUDES MICE**

Instruction sheet is available at  
[www.rockwelllabs.com](http://www.rockwelllabs.com).
