FENVA STAR EcoCAP

**New
Product!**

Microencapsulated Esfenvalerate • Zero VOCs

FenvaStar™ EcoCap™ is a superior, long- residual pyrethroid spray for fleas, cockroaches and many other structural and turf pests. It contains the tried and tested active ingredient esfenvalerate in a novel formulation for rapid knockdown of targeted pests. New EcoCap™ technology uses vegetable oil instead of petroleum products to provide long lasting residual with less harm to the environment. Never before has a pyrethroid spray been so effective while still going green. Eliminating petroleum allows the product to avoid California Prop 65 regulations. FenvaStar™

EcoCap™ is available in an economical 8 fl oz bottle, perfect for trialing the product, resale or controlling inventory.

**Label and MSDS available at
www.rockwelllabs.com.**
