FENVASTAR PLUS

EC Formulation of Esfenvalerate • Ultra Low VOCs

FenvaStar™ Plus is an 8.4% EC formulation of esfenvalerate. The product features an ultra-low VOC formula (3% versus more than 50%) compared to other ECs, for extremely low odor. FenvaStar™ Plus may be diluted with oil or water and sprayed or fogged. Independent studies show superior performance on fleas and german roaches compared to similar products, and the higher concentration offers great value. The label allows for food area

use, carpet spray for fleas and has a newly approved ULV void treatment use for bed bugs and other pests.

Label and MSDS available at
www.rockwelllabs.com.
