# Garden & Landscape Plant Food

5-1-5  
WITH 3.5% HUMIC ACID

## A NATURAL CHOICE FOR VEGETABLES, FLOWER BEDS, TREES, AND SHRUBS

Put Nature to work in your yard with Natural Guard Garden & Landscape Plant Food 5-1-5 With 3.5% Humic Acid.

### DIRECTIONS FOR USE

**Natural Guard Garden & Landscape Plant Food 5-1-5 With 3.5% Humic Acid** is a natural fertilizer formulated for use on a wide range of plants. It is a homogeneous granule that is easy to apply. As a slow release nitrogen source, the product provides "residual" soil nitrogen which is stored in the soil and becomes available to plants over a relatively long period of time during the growing season.

**DIRECTIONS:** Apply 1 lb. of fertilizer per 100 sq. ft. every month during the growing season to vegetable gardens and flower beds. For best results, water immediately after application making sure to wash any excess fertilizer off the plant's foliage into the soil. Apply around trees and shrubs in the spring, summer and fall. For trees and shrubs, apply 1 lb. per every 3 feet in plant height. Evenly apply to the soil area near the trunk to several feet beyond the foliage canopy. Water deeply to move fertilizer down to the roots.

**APPLICATION INSTRUCTIONS:** This product may be applied with a hand held spreader. If using the Ferti-lome Yard Right Hand Held Spreader, place 1 lb. of product in the spreader hopper for each 100 ft. of vegetable garden or flower bed area to be treated. Adjust setting selector to number 2. Apply product evenly over area, walking at an even pace while turning hand crank steadily.

**NOTE:** This product is made with feed grade ingredients. Persons allergic to any of the listed ingredients should not handle this product. Read entire label carefully and use according to directions.

**STORAGE:** This product is indefinitely stable in cool, dry storage conditions. Store unused fertilizer in the bag and seal tightly. Store out of reach of children and pets.

Not for use in organic crop and food production in California.
