

General Pest Kit

Kit Includes:

- (1) Demon WP (4) Pack
- (1) Maxforce FC Professional Roach Gel - 30 gm
- (1) BorActin Dust - 1 lb bottle
- (1) Puffer Duster - 4 oz

Thank you for purchasing the General Pest Treatment Kit. This kit is designed to aid in the control of cockroaches, spiders, house ants, centipedes, pillbugs, scorpions, and most common household insects. For the control of other pests not listed, please refer to the chemical label of the enclosed products or refer to our website at www.epestsupply.com for other kits. This kit is not intended for use on Carpenter Ants, Pharaoh Ants, or other hard to kill ant species.

Before applying any pesticides please refer to the label directions for the proper use as well as precautionary measures that should be taken before you use or apply these materials.

General Suggestions For Use:

Before applying any pesticide, perform an inspection that determines the insect species and the insect living areas. Make any necessary sanitation improvements.

Demon WP - One gallon of solution for an average house applied at the low rate of 0.1% (1 water soluble bag per gallon of water) is all that is usually required. Applied by use of a small hand sprayer to cracks and crevices of empty cabinets, cupboards, pantry shelves, etc. Do not spray the entire shelf, only the cracks and crevices. Also spray baseboards, behind furniture, closets, etc. To help control other pests, spray the outer perimeter of garages, around outside doors, windows, foundations, eaves, weepholes, vents, pipes, etc. Let dry thoroughly and replace cabinet linings before replacing food or utensils.

Hand Duster - Fill the duster 1/3 full with BorActin Dust and replace the rubber stopper. Shake side-to-side and turn upside down (duster tube facing up) to apply the dust. Apply dust into cracks and crevices between and under cabinets, inside walls around electrical switch plates, plumbing accesses, around and under dishwasher, stove, and under refrigerator. When applying dust, a very light dusting is all that is required. Simply squeeze the duster a few times for each application, constantly rotating it back and forth to fill duster tube with dust before squeezing. Do not apply to open baseboards or anywhere dust can be seen. Dusting is for hidden areas only. If you make a mess wipe it up with wet rag or paper towel. If duster becomes clogged, unscrew the duster tube clean out rod and insert into front of duster tube to unclog, then replace.

BorActin Dust - Apply inside walls, around pipes, plumbing, - under and behind appliances - ie dishwasher, refrigerator (unplug first), washing machine, and dryer. Also apply under and behind cabinets where they join each other, and where they meet the floor. Do not use BorActin in areas where dust can be seen.

Maxforce FC Pro Roach Gel - This tube contains 30 1 gram bait placements. Use small 1 gram "pea size" bait placements inside kitchen and bathroom cabinets or where cockroaches are found. Place bait every 12" inches or so for best results. A typical kitchen will require about 20 pea sized bait placements, more for severe cockroach infestations. Place these applications in corners of cabinets at the top and the bottom. Small wax paper squares can be cut if desired and the bait placed onto the square for placement into the cabinets. Do not place bait where it can contact food or food preparation utensils or surfaces.

It will take time to obtain insect control. Control is not immediate. be patient and allow the materials to work. Repeat application in 2-3 weeks or as necessary. This kit contains enough material to treat your home 2 or more times. Most pesticides are short lived and require regular applications on a monthly or quarterly basis to maintain their effectiveness. In addition, depending on the insect species, overcoming the egg laying process and the life cycle, eliminating insects that may be living inside walls or other untreatable areas and obtaining 100% elimination may not be possible with a single application or a (1) kit. Additional replacement products can be purchased as needed.
