Not for use in organic crop and food production in California.

Natural Guard® Rose Food supplies vital nutrients for Roses, producing more & larger flowers with strong stems & bushes.

DIRECTIONS FOR USE

New Plantings: Dig a hole about 12" across and 18" deep, add peat moss and 3 cups of **Natural Guard® Rose Food** to the soil which was removed and mix thoroughly. Use the new mixture to partially refill hole. Make a cone of soils to place plant on. Spread roots evenly. Planting depth should be such that the graft knuckle is just below ground level. Add 4 – 5 inches of soil and firm around roots. Fill hole within 2 – 3 inches of top, fill with water and let it soak in. Finish filling hole.

Established Plants: Feed monthly from beginning of season to middle of September. Keep plants mulched and watered.

Individual Plants: Apply approximately 1-¼ cups of **Natural Guard® Rose Food** around each plant and mix into the top inch of soil.

Rose Beds: Spread 3 lbs. of **Natural Guard® Rose Food** per 33 sq. ft. of bed area and mix into the top inch of soil.

STORAGE

This product is indefinitely stable in cool, dry storage conditions. Store unused fertilizer in the bag and seal tightly. Store out of reach of children and pets.
