360 Insect Concentrate

- ✓ Kills Crawling and Flying Insects: Broad Spectrum
- ✓ Easy Mixing, Low Odor Formula
- ✓ Research-Based Superior Performance
- ✓ No Water Setbacks or Runoff Restrictions

When Used as Directed

5US31203FRT20210616

Contents: 1 Gallon (3.8 L)

Concentrate

Active Ingredients:	
Geraniol	31.5%
Sodium Lauryl Sulphate.....	14.0%
Cornmint Oil.....	3.5%
Clove Oil.....	3.5%
Inert Ingredients.....	47.5%
Water, ethyl lactate, soap, polyglyceryl oleate	
Total	100.0%

This product has not been registered by the United States Environmental Protection Agency. Pertinent Animal Health, Inc. represents that this product qualifies for exemption from registration under FIFRA 25(b).

PRECAUTIONARY STATEMENTS

CAUTION Avoid breathing mist or vapors. Wash thoroughly after handling. Wear protective gloves and eye protection. Wash contaminated clothing before reuse. Dispose of contents and container in accordance with local and national regulations.

FIRST AID Have the product label available when seeking medical advice or treatment.

IF IN EYES: Flush eyes thoroughly with water for several minutes, while holding the eyelids apart. Remove contact lenses if easy to do so and continue flushing for several more minutes. Get medical attention if irritation persists. **IF ON SKIN or CLOTHING:** Take off contaminated clothing. Flush skin thoroughly with water for several minutes. Get medical attention if irritation or rash occurs. **IF SWALLOWED:** Do not induce vomiting unless told to do so by medical personnel. Get medical attention if symptoms develop.

IF INHALED: Move person to fresh air. Call a doctor for medical advice if the person has difficulty breathing or irritation persists.

PHYSICAL AND CHEMICAL HAZARDS

Do not apply on or around electrical wiring. Do not apply to hot surfaces or equipment.

WARRANTIES AND LIMITED LIABILITY

Pertinent Animal Health, Inc. warrants that this product complies with the specifications expressed in this label. To the extent consistent with applicable law, Pertinent Animal Health, Inc. makes no other warranties, and disclaims all other warranties, express or implied, including but not limited to warranties of merchantability and fitness for the intended purpose. Pertinent Animal Health, Inc.'s liability or default, breach or failure under this label shall be limited to the amount of the purchase price. Pertinent Animal Health, Inc. shall have no liability for consequential damages.

In the event of any spill, fire, disposal or medical emergency involving a human or animal, please call INFOTRAC at 1-800-535-5053, 24/7/365.

DIRECTIONS FOR USE READ ENTIRE LABEL – USE IN ACCORDANCE WITH LABEL INSTRUCTIONS

Use Sites: Indoors: Includes, but is not limited to, apartment buildings, bakeries, beverage plants, bottling facilities, breweries, cafeterias, candy plants, cereal processing and manufacturing plants, dairy barns, poultry facilities, flour mills, food processing plants, frozen food plants, homes, hospitals, hotels, houses, industrial buildings, kennels, kitchens, laboratories, manufacturing facilities, mausoleums, meat processing and packaging plants, meat and vegetable canneries, motels, nursing homes, office buildings, restaurants, schools, stores, supermarkets, warehouses and similar structures.

Use Sites: Outdoors: Includes, but is not limited to, building foundations, dairy facilities, drive-in restaurants, drive-in theaters, golf courses, parks, playgrounds, poultry houses, recreational areas, schools, urban areas, lawns, landscape areas, trees, turf, and zoos.

Use sites: Modes of Transport: Aircraft, buses, trucks, trailers, rail cars and marine vessels.

MIXING INSTRUCTIONS AND APPLICATION EQUIPMENT:

360 Insect Concentrate may be diluted with water and applied with conventional application equipment including, but not limited to, compressed air sprayers and power sprayers. When diluting with water, prepare only the amount needed for immediate use. Tank mix applications must be made in accordance with the more restrictive of label limitations and precautions. This product cannot be tank mixed with any product with label prohibitions against such mixing. Most effective results are achieved when used as part of a treatment protocol that includes physical, environmental, and other chemical pest control measures. NOTE: For sensitive indoor/outdoor surfaces such as vinyl, plastic, fabric, wood floors, etc., test a small non-visible area first before spraying. This includes vinyl siding, outdoor furniture, storm doors and windows, etc. It is possible that 360 Insect Concentrate may mar some sensitive surfaces. If spray gets on any sensitive surface that is listed, simply rinse with water, and wipe off with clean cloth.

Mixing: Dilute at the rate of 1-8 oz of concentrate per gallon of water. (1 gallon of the concentrate can be added to 16-120 gallons of water). Use the high concentration for severe infestations and low concentration for maintenance applications.

Method of Application: In compressed air or powered backpack, hand-held, or other sprayers, apply at 1-2 gallons of diluted solution per 1000 sq. ft., until area is sufficiently covered. In mister or fogger systems, apply at 0.2 gallon/1000 cu. ft. Reapply as often as needed.

Indoor use: To control accessible, exposed stages of crawling and/or flying insects including, but not limited to, ants, bedbugs, cockroaches, fleas, ticks, flies, mosquitoes, spiders, and other occasional invading pests.

FLEAS/TICKS: When treating for fleas and ticks, thoroughly clean, vacuum, and clean floors upholstery prior to treatment. Mix 360 Insect Concentrate as described above and apply as a spot treatment to cracks and crevices, on floor and upholstery as broadcast. On mattresses and springs, spot treat only areas that may harbor pests. Repeat as necessary.

BED BUGS: When treating for bed bugs, thoroughly clean, vacuum, and air mattresses and springs prior to treatment. Mix 360 Insect Concentrate as described above and apply as a spot treatment to cracks and crevices, around baseboards, floorboards, headboards, and walls. In hotels and other public lodging facilities, pay special attention to luggage stands and the adjacent area. On mattresses and springs, spot treat only areas that may harbor pests. Concentrate on tufts, seams, folds, and creases. Repeat as necessary. To prevent potential discoloring, do not spray on visible areas (ie, baseboards, door frames, walls, etc.) and wipe away excess.

FOGGING: To control crawling and flying insects (including flies, mosquitoes, and gnats) in sites that include, but are not limited to, food processing plants, (INCLUDING USDA INSPECTED FACILITIES), industrial installations, animal quarantines and warehouses, 360 Insect Concentrate may be applied as a space spray through conventional fogging equipment misting systems (including mist sprayers and mist blowers), automated spray systems, and/or related application technologies.

FOOD PROCESSING PLANTS, INCLUDING FEDERALLY INSPECTED: When using this product as a space spray in food processing plants, remove or cover foods during treatment. Do not apply as a space spray while food processing is underway. Food processing surfaces and equipment must be covered during treatment or cleaned with an effective detergent and rinsed with potable water before reuse. Food processing operations may continue when this product is applied as a surface spray with care and in accordance with the directions and precautions.

Outdoor Use: For perimeter treatments, mounding ants, lawn treatment for fleas, mosquitoes and other flying insects, lawn, turf, grass, ornamental trees and shrubs, as a spray or fogging/misting application. Avoid treatment around or on sensitive plants; test in a small area if there is any question. Exceeding recommended dosage or dilution rates may result in damage to plants.

Dilute as directed above (use lower rate for maintenance service and

or flying insects including, but not limited to, ants, bedbugs, cockroaches, fleas, ticks, flies, mosquitoes, spiders, and other occasional invading pests).

FLEAS/TICKS: When treating for fleas and ticks, thoroughly clean, vacuum, and clean floors upholstery prior to treatment. Mix 360 Insect Concentrate as described above and apply as a spot treatment to cracks and crevices, on floor and upholstery as broadcast. On mattresses and springs, spot treat only areas that may harbor pests. Repeat as necessary.

BED BUGS: When treating for bed bugs, thoroughly clean, vacuum, and air mattresses and springs prior to treatment. Mix 360 Insect Concentrate as described above and apply as a spot treatment to cracks and crevices, around baseboards, floorboards, headboards, and walls. In hotels and other public lodging facilities, pay special attention to luggage stands and the adjacent area. On mattresses and springs, spot treat only areas that may harbor pests. Concentrate on tufts, seams, folds, and creases. Repeat as necessary. To prevent potential discoloring, do not spray on visible areas (ie, baseboards, door frames, walls, etc.) and wipe away excess.

FOGGING: To control crawling and flying insects (including flies, mosquitoes, and gnats) in sites that include, but are not limited to, food processing plants, (INCLUDING USDA INSPECTED FACILITIES), industrial installations, animal quarantines and warehouses, 360 Insect Concentrate may be applied as a space spray through conventional fogging equipment misting systems (including mist sprayers and mist blowers), automated spray systems, and/or related application technologies.

FOOD PROCESSING PLANTS, INCLUDING FEDERALLY INSPECTED: When using this product as a space spray in food processing plants, remove or cover foods during treatment. Do not apply as a space spray while food processing is underway. Food processing surfaces and equipment must be covered during treatment or cleaned with an effective detergent and rinsed with potable water before reuse. Food processing operations may continue when this product is applied as a surface spray with care and in accordance with the directions and precautions.

Outdoor Use: For perimeter treatments, mounding ants, lawn treatment for fleas, mosquitoes and other flying insects, lawn, turf, grass, ornamental trees and shrubs, as a spray or fogging/misting application. Avoid treatment around or on sensitive plants; test in a small area if there is any question. Exceeding recommended dosage or dilution rates may result in damage to plants.

Dilute as directed above (use lower rate for maintenance service and

higher rates for active infestations) and apply at the rate of 1-2 gallons per 1,000 square feet or until area is thoroughly wet. Also apply to a band of soil and vegetation 6 to 10 feet wide around and adjacent to buildings. Treat the building foundation to a height of 2 to 3 feet with sufficient water for coverage. Make special efforts to spray areas where pest species congregate such as, but not limited to, waste receptacles, dumpsters, unoccupied picnic tables, the exterior of food handling establishments, and food pavilions. Additionally, apply around potential entry areas such as, but not limited to, eaves, windows, doorways, porches, porchlights, and around utility boxes.

SPIDERS, FLYING INSECTS, AND OTHER NUISANCE PESTS ON AND AROUND BOAT DOCKS: As an aid in the elimination of their harborage areas, dilute 360 Insect Concentrate as directed above and apply at the rate of 1-2 gallons per 1,000 square feet or until area is thoroughly wet. Since flying insects can migrate in and out of the treatment area, it is recommended to use this product as part of an Integrated Pest Management (IPM) program. This includes, but is not limited to, eliminating breeding and harborage sites.

MOSQUITO AND FLY CONTROL - OUTDOOR YARD OR BARRIER TREATMENT: To control adult mosquitoes and other biting flies using ground application, dilute 360 Insect Concentrate as directed above. Treat harborage areas such as shrubbery and vegetation where mosquitoes/files may rest. Shrubbery and vegetation around stagnant pools, marshy areas, ponds, and shorelines may be treated. Repeat as necessary.

OUND DRENCH METHOD - FOR CONTROL MOUNDING ANTS: Dilute 360 Insect Concentrate as directed above. Apply 1-2 gallons of diluted product to each mound area by sprinkling the mound until it is wet and treat a 4-foot diameter circle around the mound. Use the higher volume for mounds larger than 12 inches. For best results, apply in cool weather such as the early morning or late evening hours, but not in the heat of the day.

MOSQUITO CONTROL AND OTHER FLYING INSECTS - AUTOMATIC SPRAYING SYSTEMS: Dilute 360 Insect Concentrate as directed above (use lower dilution rates for preventative applications). Automatic spraying systems must not be programmed to release pesticides where food or feed is directly exposed. To control flies, house flies, horn flies, stable flies, horse flies, mosquitoes, and gnats, add concentrate to tank and add water to obtain desired dilution. In automatic spraying systems like, but not limited to, misting systems used for mosquito and other biting insect
